

ROM OIL SPILLAGE UNIT

IDEAL FOR REMOVING OIL AND FUEL ON FILTHY ROAD SURFACES!

The oil spillage unit has been developed for the cleaning of road surfaces that are soiled with oil or fuel. The unit can be built onto a ROM 400 and a ROM 600. In most cases it is also possible to install the unit underneath a truck or van.

OIL SPILLAGE UNIT

The unit for containment of oil spills comprises:

- Spray booms for cleaning wide and narrow tracks of oil spillage
- Injectors for injecting the right quantity of cleaning agent
- Stainless steel tank for cleaning agent

(Art.no. 04234)

OPTIONAL

- Spray lance with rotary cutter

(Art. no. 04235)
