

SPRAY GUN

For spray cleaning of various surfaces. Equipped with flat-jet nozzle.

PERFORMANCE:

- Spray gun including quick coupling with detachable 90-cm lance, allowing a baby hose to be connected, if desired.
- Spray gun including 50-cm double-spray lance

(Art.no. 2908)

**BABY HOSE**

For cleaning of pipes with a diameter of between 32 and 80 mm. Can be connected to spray lance or HP hose.

PERFORMANCE:

- ¼" (ND6) HP hose including quick coupling for connecting to spray gun and nozzle no. 31
- Length of the HP hose is 12 m

(Art.no. 28091)

**VENTURI-TYPE EJECTOR**

The open venturi-type ejector and the venturi-type ejector with filter have been developed to empty basements and pits using a high-pressure installation. The fixed, built-on venturi-type ejector is intended to fill the water tank of the high-pressure device with surface water.

PERFORMANCE:

- **Open venturi-type ejector**
Including 10-m hose (ND50) and ½" HP hose coupling.
(Art.no. 1061)
- **Venturi-type ejector with filter**
Including 10-m hose (ND 50), filter, and ½" HP hose coupling.
(Art.no. 1062)
- **Fixed, built-on venturi-type ejector**
Including 10-m hose (ND 50) and filter.
Fixed on top of the water tank.
Capacity: 160-220 l/min
Maximum suction depth: 5-7 m

(Art.no. 0481)

ROM PIT SHOVELS & REELING WAGON

PIT SHOVELS

For emptying of pits and gullies.

PERFORMANCE:

- Pit shovel square 15 x 15 cm (Art.no. 0553)
- Pit shovel square 20 x 20 cm (Art.no. 05531)
- Pit shovel round 13 cm (Art.no. 0552)
- Pit shovel round 20 cm (Art.no. 05521)

REELING WAGON

If the length of the high-pressure hose is insufficient, this reeling wagon may be connected.

PERFORMANCE:

- The reeling wagon is equipped with ball valve, radial swivel joint, and crank, enabling easy operation from this reeling device. (Art.no. 2938)
- Hose length up to 80 m possible.
